OBJECTIVE

Computer Science undergraduate with a strong foundation in UI/UX design and front-end fundamentals, seeking full-time UI/UX Designer roles. Proficient in Figma for wireframing, prototyping and developer handoff, complemented by hands-on experience in HTML, CSS and Python-based application development. Skilled at translating user needs into clean, functional interfaces.

EDUCATION

Diploma, Computer Science and Engineering, Sriram Engineering College — Thiruvallur, 2021-2023
CGPA: 7.1

BE, Computer Science and Engineering, Sriram Engineering College — Thiruvallur, 2023-2026
CGPA: 7.9

SKILLS

Design & Prototyping	Figma (wireframes, prototypes, design systems, developer handoff)
UI/UX Fundamentals	User-centered design, usability principles, interaction design, visual hierarchy
Front-End	HTML, CSS, JavaScript (basics)

EXPERIENCE

UI/UX & Front-End Intern — 2026
Kenmac Corporate Private Limited — *Tiruvallur*

- Designed UI/UX for websites and mobile apps, creating wireframes and prototypes in Figma.
- Built and customized websites using WordPress, aligning themes and layouts with design specifications.
- Developed cross-platform mobile app interfaces using Flutter, translating design mockups into functional screens.

Data Science & AI Intern — 2024 - 2025
Rasa AI Labs — *Chennai*

- Contributed to real-time AI and data-driven projects, translating user requirements into functional interface and workflow decisions.
- Collaborated cross-functionally to align technical implementation with usability goals.

Data Science & Analytics Intern — Apr 2025 - May 2025
Remark Skill Education — *Hyderabad (Online)*

- Analyzed real-world datasets and built visual, easy-to-interpret reports for non-technical stakeholders.
- Applied data-interpretation insights to inform clearer, user-friendly presentation of findings.

PROJECTS

School Website UI/UX Design. Designed the complete UI/UX in Figma, from wireframes to a responsive high-fidelity prototype, for a multi-page school website. Created a consistent design system (typography, color palette, components) and structured navigation around key user journeys for students, parents and staff.

CRM System, UI/UX Design. Designed the UI/UX for a Customer Relationship Management system, including dashboards, lead tracking and contact management screens. Built low-fidelity wireframes through high-fidelity interactive prototypes to map key user flows.

AI Cooking Assistant. Developed an AI-powered multilingual cooking assistant using Python to deliver personalized recipe recommendations and step-by-step cooking guidance, with NLU-based intent recognition, voice interaction (gTTS) and Deep Translator for multilingual support.
